Besides living 11 years onboard as a child, I have been working professionally in the maritime industry since 2012 as crew member and as captain/skipper in private and charter yachts.

I have carried out navigations in many countries and situations, three trans-Atlantic crossings, extensive experience and knowledge on maintenance and systems, managing crew and contractors during yard periods and conducting all administrative duties from yacht's compliance and paperwork to itinerary design.

In 2015 and 2016 I had my own charter company, acting as skipper of my own boat while running the brokage of other charter yachts.

I'm currently studying the last year of the Yacht Design and Production degree in Southampton Solent University, where I am obtaining a deepen knowledge of boat building, the technicalities of yachts, and computer-aided design.
